_____Cut here and keep the lower part with you _____

About your Linux account

- Using this account you can log into any machine in the Computer Lab, or any machine networked to the Server.
- Change your password with the `yppasswd` command on any machine networked with the Server.
- You can use Mathematica from any machine in the Centre which is networked to the server.
- Your home directory will remain on the server, and will be visible on all the networked machines.
- This account is supposed to be personal - do not share your password with anybody.
- Your home directory is assigned a quota of space it can occupy. Use the `quota` command to frequently check how much space you are occupying. If you are about to exceed your quota, delete some unnecessary file.
